Hi!

My name is Ann Green and I am contacting you on behalf of the Sierra Student Coalition at UNC--Chapel Hill. We worked on the Coal Free Campus Campaign here, and as you may have heard, had a very successful campaign. UNC renewed its coal contracts over the summer, since they expired in June, and now has contracts with three new suppliers. Our coal now comes from three different contour mines--two in Virginia, and one in Tennessee. The coal we were getting at UNC before the contracts were renewed over the summer turned out to be from an MTR site (well they didn't call it that, but the mountain sure wasn't looking too good). I know Mr. Wasson was able to look into where our coal was coming from last year, so I was wondering if you could help us find where our coal is coming from now that we have a new contract. I have attached the public records to this email that we received from our school. It would be nice to get some pictures or even to be able to show one of those Google Earth presentations from the mines that supply UNC's coal! Thanks again for all the help and momentum you brought to our campaign last year!

Thank you,

Ann Green
